

EZYB2B is a business-to-business message transformation, message exchange and management system.

With over 20 years of experience in Electronic Data Interchange (EDI), our team at Neller Connect are experts in our field and are respected for our innovative solutions and responsiveness to our Customers' requirements.

EZYB2B enables your business, regardless of size, to trade electronically with all your suppliers and EDI-capable customers.

"Neller Connect have provided excellent service to assist us in establishing new direct trading relationships with our suppliers and customers. We can thoroughly recommend their software and services." **Remmon Roque, IT Manager, Heatcraft Australia**

"The overall service provided by Neller Connect has been very impressive and their fixed price subscription fee model is very attractive. We are pleased with our decision to change over to them." **John McKillop, IT Manager, Sylvania Lighting Australasia**

"We have found Neller Connect to be extremely flexible and responsive to our requirements. We can highly recommend them as experts in their field." **Michael Zabala, IT Administrator, Heldon Products Australia**

"Implementing EDI with our first major customer has been a painless and efficient process, thanks to the skill and focus of the Neller Connect team." **Scott Page, Financial Controller, Angelakis Bros.**
